DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 11, drawn to a method of performing spectrophotometric analysis on a portion of a liquid sample, classified in class 356, subclass 244.
 - II. Claims 2-10, 12-14, drawn to a method of performing measurements on a portion of liquid sample in a clinical analyzer, classified in class 436, subclass 180.
 - III. Claim 15, drawn to a clinical analyzer apparatus for performing measurements on a portion of liquid sample, classified in class 422, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, e.g. microscope slide stainer.

This relationship is applicable to Groups I and III.

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are not disclosed as capable of use together and they have different modes of operation and different functions. The steps of Group I do not require the specific sample

processing elements e.g. sample metering apparatus of Group II. Similarly, the steps of Group II do not require the specific use of a first clinical chemistry process and a parallel spectrophotometry process.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for the others, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Michael Montgomery on April 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
